

Course Syllabus VE281 Data Structures and Algorithms Fall 2016

Course Description:

Introduction to algorithm analysis and big-Oh notation; Fundamental data structures including priority queues, hash tables, binary trees, binary search trees, balanced trees, and graphs; Searching and sorting algorithms; Basic graph algorithms; Introduction to dynamic programming and branch-and-bound techniques.

Instructor:

Weikang Qian Email: <u>qianwk@sjtu.edu.cn</u> Phone: 34204020 Office: Room 421, JI Building Office hour: Monday 1:00 pm – 2:00 pm and Wednesday 1:00 pm – 2:00 pm, or by appointment

Textbook (Recommended but not required):

4

1. *Data Structures and Algorithm Analysis*, by Clifford Shaffer. Online available: <u>http://people.cs.vt.edu/~shaffer/Book/C++3e20120605.pdf</u>

2. *Data Structures and Algorithms with Object-Oriented Design Patterns in C++*, by Bruno Preiss. Online available: <u>http://www.brpreiss.com/books/opus4/html/book.html</u>.

3. *Introduction to Algorithms*, 3rd edition, by Thomas Cormen, Charles Leiserson, Ronald Rivest, and Clifford Stein, MIT Press, 2009.

Class Webpage:

Log into Canvas at <u>https://sjtu-umich.instructure.com/courses/146</u>. Announcements, lecture slides, assignments, and grades will be posted on the class webpage.

中国 上海闵行区东川路 800 号 邮编 200240 Tel: +86-21-34206045 800 Dong Chuan Road, Shanghai, 200240, PRC http://umji.sjtu.edu.cn

Course Prerequisites:

Ve280 Programming and Elementary Data Structures and Ve203 Discrete Mathematics.

Grading Policy:

There will be 4~5 written assignments, 4~5 programming assignments, one midterm exam, and one final exam. The grading distribution is:

In-class quizzes: 4%

Written assignments: 16%

Programming assignments: 30%

Midterm Exam: 20%

Final Exam: 30%

Any questions about the grading of the projects or exams must be brought to the attention of your TAs or the instructor within one week after the item is returned.

Exam

The exams will be closed book ones. No electronic devices are allowed in the exams.

You are expected to take both exams at the scheduled times. If you miss an exam, and a medical or personal emergency is not involved, you will receive a zero for that exam. If you anticipate an exam in another course, you must notify the instructor at least one week before the exam date.

Academic Integrity:

- 1. All students are expected to attend all of the lectures.
- 2. All programming assignments must be done by yourself independently. You may discuss the project in oral with other student. However, you may not read/copy others' solution and you may not use test cases from others. In all cases in which we have reason to believe that cheating has occurred, we will report your case to the Honor Council for evaluation.
- 3. Exams will be given under the JI's Honor Code and will require individual efforts.

Teaching Schedule (Subject to Change)

0 TO

Lecture	Date	Teaching Activities (Topics and Exams)
1	Sep. 12	Course Introduction; Asymptotic Algorithm Analysis
2	Sep. 14	Asymptotic Algorithm Analysis
3	Sep. 19	Analyze Program; Basic Sorting; Merge Sort
4	Sep. 21	Quick Sort; Comparison Sort Summary
5	Sep. 23	Non-comparison Sort
6	Sep. 26	Linear-time Selection
7	Sep. 28	Hashing
8	Oct. 10	Hashing: Open Addressing
9	Oct. 12	Universal Hashing
10	Oct. 17	Rehashing; Bloom Filters
11	Oct. 19	Binary Trees; Binary Tree Traversal
12	Oct. 21	Priority Queues; Heaps
13	Oct. 24	Heaps; Binary Search Trees
14	Oct. 26	Binary Search Tree Time Complexity
	Oct. 31	Midterm
15	Nov. 2	Binary Search Tree Other Useful Operations; k-d Trees
16	Nov. 4	Tries; AVL Trees
17	Nov. 7	AVL Trees
18	Nov. 9	Red-black Trees
19	Nov. 14	Red-black Trees; Graphs
20	Nov. 16	Graph Representation; Graph Search; Topological Sorting
21	Nov. 18	Shortest Path
22	Nov. 21	Minimum Spanning Trees
23	Nov. 23	Dynamic Programming: Matrix-Chain Multiplication
24	Nov. 28	Dynamic Programming: Longest Common Subsequence
25	Nov. 30	Dynamic Programming: Knapsack Problem
26	Dec. 2	Bellman-Ford Algorithm; All Pairs Short Paths
27	Dec. 5	Union-Find Data Structure
28	Dec. 7	Branch-and-bound Algorithm
